What is the Best Time

FOR NEWBORN PORTRAITS?

The best time to photograph your newborn baby is when he/she is 10-14 days old. This is the perfect time to take peaceful sleeping images of them and show how tiny they are.

If - for any reason - you are not able to bring your baby so early, it is perfectly fine, beautiful moments can be captured later as well, when the baby is a bit “older”. For example, a 10-12 weeks old baby can already hold his/her head, smiles and interacts with the parents. We consider our baby portrait sessions newborn sessions for up to 3 months old babies.

We also recommend to book your session a few weeks ahead because our calendar fills up quickly.

The Viewing

CHOOSING YOUR IMAGES

After your portrait shoot I will hand select the best of the best shots from your session. I'm going to choose only the epic images from the day, about 40-50 of them.

We are going to have another appointment, your reveal session, where I will show you a cinematic presentation of the images and then you get to choose your favourite ones and decide on your portrait collection.

I will give each of your chosen images a signature retouch and will also design and order the printed art you choose with your collection.

Payment for images, printed art and portrait collection is due at the reveal session.

A man with dark hair and a beard, wearing a dark blue button-down shirt, and a woman with dark hair, wearing a dark green top, are holding a newborn baby. The baby is wrapped in a light-colored, textured blanket and is sleeping. The man is looking down at the baby, and the woman is smiling at the camera.
