What is the Best Time

FOR MATERNITY PORTRAITS?

The best time for maternity portraits is sometime between 26-34 weeks of pregnancy.

The ideal time can be different individually and depends on many things like the size of the baby, the built and height of the expecting mum, and if she has any issues during her pregnancy.

The best advice is to have your maternity photos taken when your belly already obviously shows and you are feeling great and up to it.

It is always a good idea to come for a pre-shoot consultation sometime during the second trimester and discuss the best time individually.

What is the Best Time

FOR NEWBORN PORTRAITS?

The best time to photograph your newborn baby is when he/she is 10-14 days old. This is the perfect time to take peaceful sleeping images of them and show how tiny they are.

If - for any reason - you are not able to bring your baby so early, it is perfectly fine, beautiful moments can be captured later as well, when the baby is a bit “older”. For example, 8-10 week old babies can already hold their heads, they smile and interact with the parents. We consider our baby portrait sessions newborn sessions for up to 3 months old babies.

We recommend to book your session a few weeks ahead because our calendar fills up quickly.

The Viewing

CHOOSING YOUR IMAGES

After each portrait session I will hand select the best of the best shots from your session. I'm going to choose only the epic images from the day, about 40-50 of them.

We are going to have another appointment, your reveal session, where I will show you a cinematic presentation of the images and then you get to choose your favorite ones.

I will give each of your chosen images a signature retouch and will also design and order the printed art you choose with your collection.

A pregnant woman with long dark hair, wearing a flowing, strapless orange dress, is shown in profile, gently holding her belly. The background is a dark, textured grey.
